hang on a few seconds...

result screen 1:

The screenshot shows the GetSafe dashboard with the following details:

- Header:** GetSafe logo, PRICING, FAQ, DASHBOARD, user icons, Create free account, Sign in.
- Main Title:** Meet your Website Co-Pilot
- SubTitle:** The **best assistant** you ever had!
- Address Bar:** https://www.milligramm-berlin.de, Analyze button.
- Website Info:** www.milligramm-berlin.de, https://www.milligramm-berlin.de/
- Score:** 100 Overall Score
- Technical Metrics:** HTTPS, Status 200, WordPress 6.8.3, DE, 217.160.0.79, 2026-01-13T00:51:35.419Z
- Device View:** Desktop selected, Mobile view.
- Website Preview:** Shows a screenshot of the Milligramm Krankenpflege website.
- Co-Pilot Greeting:** Nice to meet you! I'm your Co-Pilot, here to help you make your website faster, more secure, and easier to find. Let's discover what we can improve together!
- Analysis Progress:** Analysis in progress...
- Category Cards:** SEO (blue bar), Accessibility (green bar), Performance (yellow bar), Security (purple bar).

Home test display text (i18n):

Screenshot card would look more aligned with (new name) Sparky greeting by aligning the 2 tabs right.

Let's give our assistant a name for better recognition!

⭐ Sparky

Hi, I'm Sparky your Co-Pilot, here to...

4 categories and the result cards should match the awesome look of cockpit site display

design. We need to achieve a unified look of all elements! Let's compare & analyze the two site displays (sk-rent.de screenshots below for logged in user) and create a new awesome display with the best features of both. The homepage test is meant to be a teaser of the original – only showing a snapshot of what Sparky can do!

result screen 2:

The screenshot shows the WordPress Smart Hints plugin interface. At the top, it says "Save Your Analysis & Access Full Report" with a message: "Your site scored 100/100. Create a free account to access detailed recommendations, security checks, and more." Below this is a green button labeled "Save & View Full Report". A note below the button says "Free account • No credit card required • Results saved automatically". The main area contains four items with icons and descriptions:

- Hide version meta**: Remove the <meta name="generator"> tag to avoid leaking the CMS version.
- Restrict REST API**: Require authentication for /wp-json/ unless your app needs public endpoints.
- Disable XML-RPC**: Turn off XML-RPC to reduce brute-force surface and pingback abuse.
- Auto-update minor versions**: Enable automatic minor updates to receive security patches quickly.

At the bottom right, there is a link "Open WP Toolbox →".

- Button text change from: Save & View Full Report → Save & Create Free Account.
- (i18n) add to messages/en.json + 5 more to "actions" and add more action text that we will be using.
- Suggestion: create a messages/CoPilot directory to keep messages easy maintainable?

StreamingReportShell displays the
/* Optional WP spotlight under the hero */

→ move CTA 1 below the test result.

For Website Owners & Webmasters

Let your AI Copilot maintain and optimize your sites – **without writing a single line of code**.

Paste your URL and watch your site level up in minutes:

- Fresh, on-brand content; translate your entire site for global reach
- Full SEO control with structured data (Schema), sitemaps, and metadata
- Faster load times with image lazy loading
- Security hardening via headers and custom scripts (XSS, DDoS)
- Cost-effective UX and theme tweaks for a great experience on every device
- WordPress & WooCommerce: a tailored toolbox that fixes known issues

Say goodbye to hours of fiddling – show off homepages you're proud of, no coding needed!

For Web Developers & Pros

Get your own web copilot and **ditch the GitHub hassle** – upgrade any site with zero setup.

Your AI agency teammate helps you build your best work:

- Automate the boring stuff, surface bugs fast
- Supercharge SEO and structured data; generate XML & LLM sitemaps
- UX improvements with lazy loading and script optimizations for faster delivery
- Add configurable protections against common attacks (SQL injection, XSS, DDoS)
- Internationalize with i18n for true global reach
- Ship high-value features and redesigns your clients will love

Let AI handle the toil so you save hours, cut costs, and supercharge your flow – and your bottom line!
